LEARN MORE ABOUT

CARDIO-ONCOLOGY PROGRAM

Ideal for Oncologists Like You

OHVC will track and follow cardiac issues to provide your patients with state-of-the-art monitoring, and early warning of developing problems and maximum information for clinical decision-making.

More Reasons Why This Benefits You

- Program reduces oncologist's liability risk by reducing risk of deadly or disabling cardiac damage.
- Tested strategies to prevent irreversible cardiac damage associated with cancer treatment (chemotherapy and radiotherapy), which can be implemented by close cardiovascular monitoring of those patients with advanced cardiac imaging and biomarkers (blood tests).
- Lifestyle modification and evaluation of functional capacity before formal exercise
